

RICK D. WILSON (b:1955)

American

BIO:

Rick's painting career as a professional began in 2003 after painting at a hobby level for about 33 years. He credits C.W. Mundy and Ron Mack for kick starting his artistic career and many Hoosier artists for their encouragement and inspiration.

Rick eventually found his own “voice” when he discovered the artists of the French Barbizon School and the American Hudson River School. The luminosity and warm pallet was a real draw for Rick and he soon developed his own similar pallet and style. Subject matter varies greatly from landscapes to seascapes and from skyscapes to portraiture. “When painting, subject matter shouldn't determine the degree of difficulty, only the degree to which we see. Once we develop the art of seeing, or observation, subject matter becomes irrelevant in terms of difficulty. Then, artistic freedom can be achieved”

Rick has been honored with many awards and commissions and has an extensive corporate and private collector list. In 2016, Rick and the Richmond Art Museum presented a traveling 70 painting exhibition highlighting Indiana's State Parks as an Indiana Bicentennial Legacy Project. That project also won an award of excellence from the Indiana State Historical Society.

CORPORATE COLLECTIONS

Congressman Greg Pence
